PURESAN Bio Clear is a Bacillus Subtilis biotechnological tablet with built-in solid oxygen

- **PURESAN Bio Clear** is a unique product and contains specially selected bacteria, to digest fats, oils, grease and uric acid responsible for clogging drains
- **PURESAN Bio Clear** contains solid oxygen to provide the aerobic bacteria with the needed oxygen to get to work digesting organic load in the U-Trap and drain pipes
- **PURESAN Bio Clear** has proven itself to keep drain pipes free flowing whilst eliminating malodors emanating from drains
- **PURESAN Bio Clear** has an eco-positive knock-on effect downstream by putting good bacteria into effluent. The bacteria continue multiplying and completing the biodegradation process.

PURESAN Bio Clear is used effectively in:

- Industrial Facilities
- Commercial and Residential Properties

Directions for use of PURESAN Bio Clear

Drop one **PURESAN Bio Clear** Tablet into the drain or urinal drain, just before switching the lights off in the kitchen and bathroom. In commercial and industrial kitchens and bathrooms more than one tablet might be needed until the micro biome has been established.
