## PURESAN P Block

Urinal Block – Eliminates Malodours & Blockages

 **PURESAN®**

**P Block – Each flush enhances effluent and reduces malodours**

**High concentration microbial urinal effluent treatment**

Solving man-made problems with nature-made solutions

 **PURESAN®**

## High Concentration microbial urinal waste water treatment additive

- **PURESAN P Block** is a natural biological high potency urinal waste water treatment additive. Contains no pathogens or harmful toxins and chemicals.
  - **PURESAN P Block** contains microbial organisms specifically selected to effectively treat organic waste encountered in urinals and toilets.
  - **PURESAN P Block** contains no less than 8 million viable organisms per gram.
  - **PURESAN P Block** is a biotechnology-based product for the treatment of urinals and toilets. The biological component continually eliminates bad smells and reduces the formation of uric acid build-up whilst enhancing the biodegradation of organic matter in downstream effluent.
- 
- **PURESAN P Block is used effectively in:**
  - Industrial bathrooms
  - Commercial bathrooms
  - Urinal and toilets – especially effective where a septic tank or French drain system is used as the beneficial bacteria will enhance the WWTP – municipality WWTW biome is enhanced downstream.

## PURESAN P Block will effectively treat:

- High organic waste water
- Eradicate malodours
- Break down uric acid crystal build-up in sewer line, thus preventing blockages and malodours
- Enhance the downstream effluent by adding beneficial environmentally positive good bacteria

**FROM HERE**

**TO HERE – the natural way, without doing harm to the plants, water, humans, animals and the ocean.**

## Directions for use of PURESAN P Block

---

Use in the Urinals. Can be dropped into Urinal outlet to settle in the U-Trap where it will start treatment the entire system with the specially selected beneficial environmentally positive bacteria to ensure odour control, solid digestion and improved effluent water quality.

### PURESAN P Block is available in:

---

200 x 20g blocks in a plastic bucket with lid.
